WAKE RADIOLOGY
UNC Health Rex

# my UNC Chart™

## How to Download Your Images from My UNC Chart

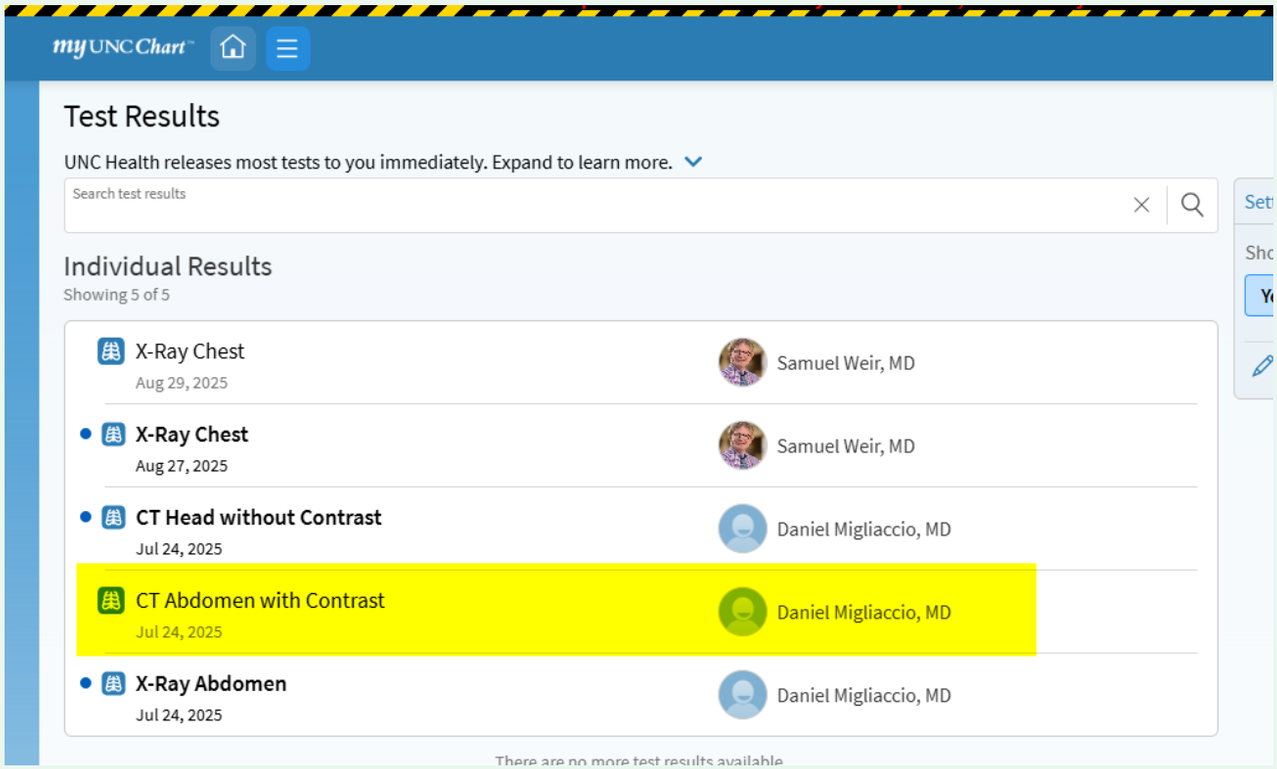

**1** Once logged into My UNC Chart, click on **Test Results.**

**The following process can be used to download the patient study on both Windows and Mac computers; however, image viewing is not supported on Mac systems.**

## 2

You will be brought to the test results screen. Locate the study you want to download, and click one time to open. In this example, we will be downloading the **CT Abdomen with Contrast.**

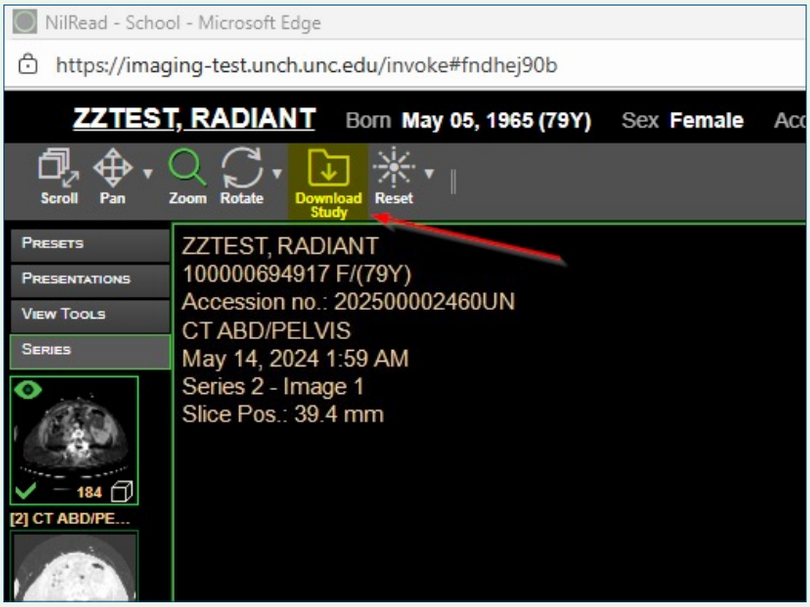

## 3

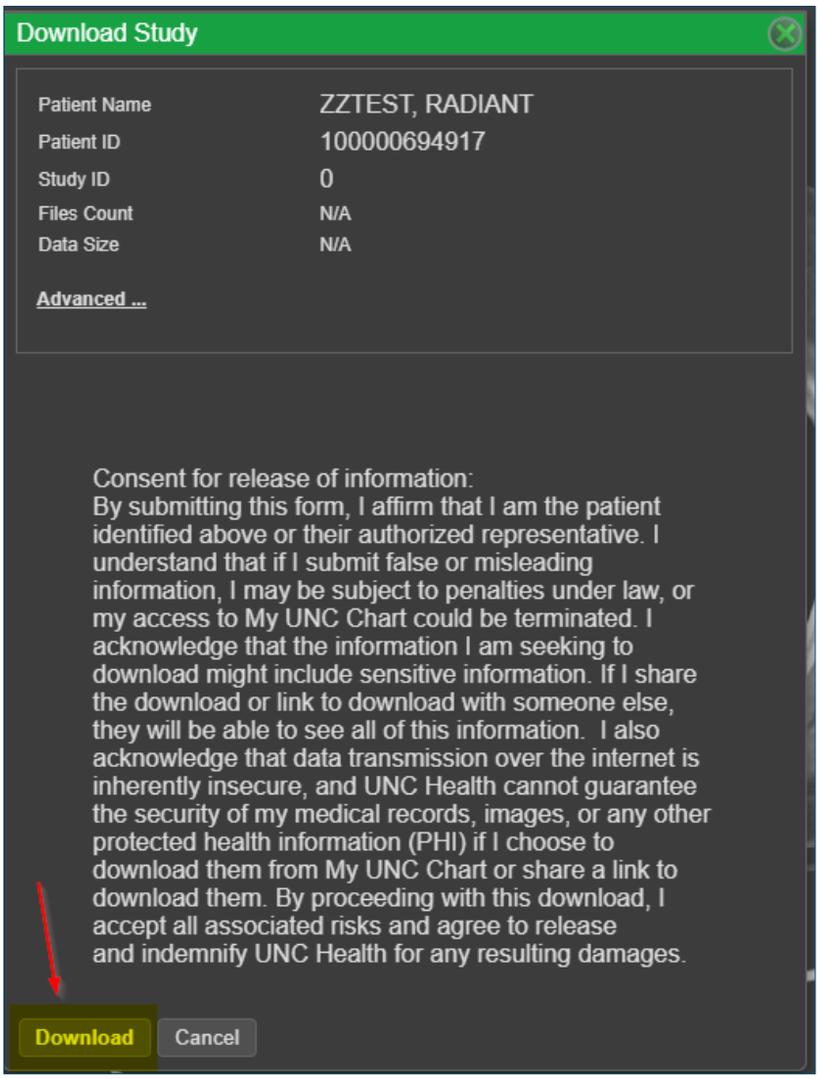

You will then see a screen where you will see the results of your exam. Scroll to the bottom until you see **Linked Images.**

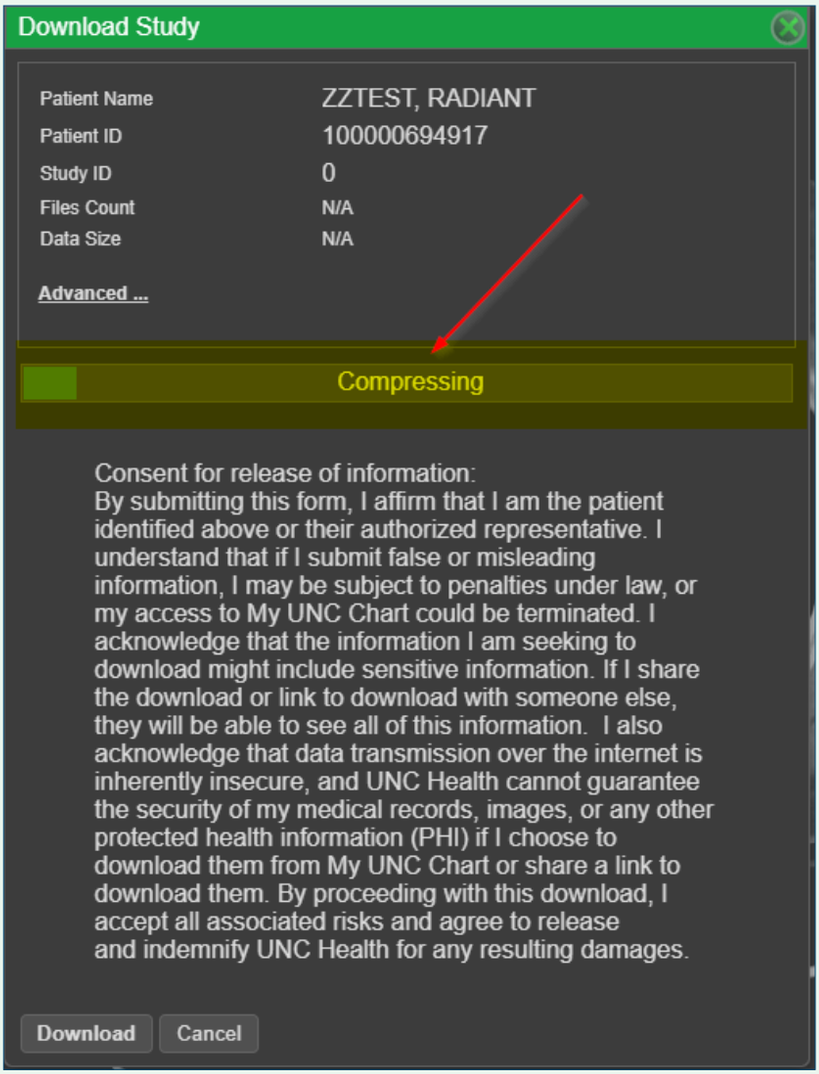

**4** The NilRead viewer will open up, and in the top toolbar find **Download Study.**

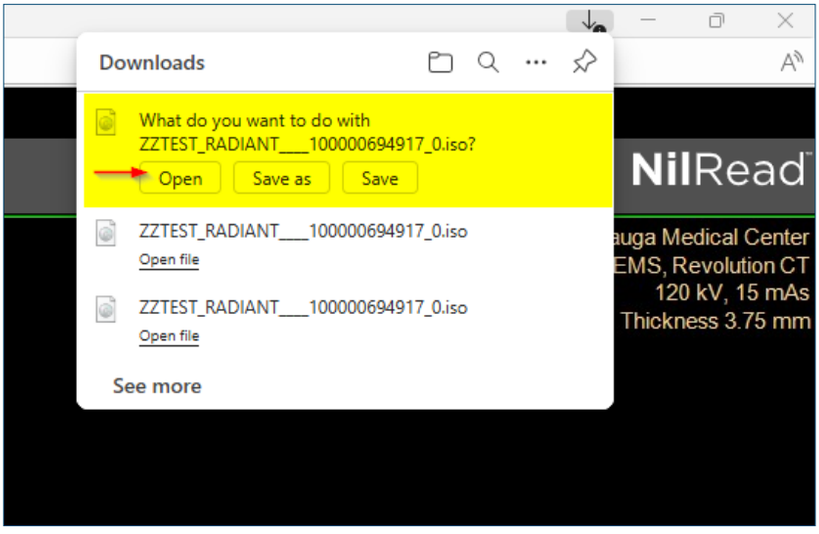

**5** Click on **Download Study**, and the consent will pop up. Click on **Download.**

**6** You will then see the images are compressing. This may take a few minutes.

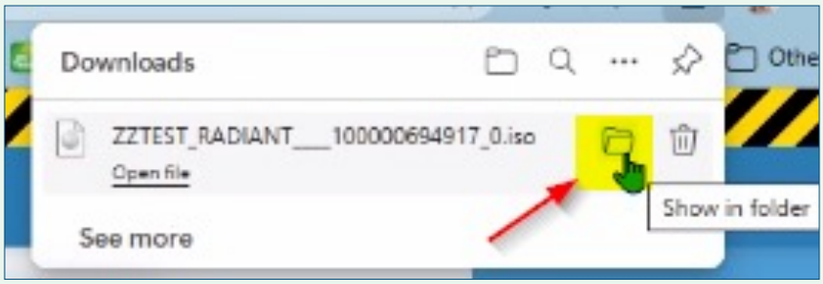

**7** Once the images are compressed, a pop up will appear in the upper right hand corner. Click on **Open.** This process may take a few minutes.

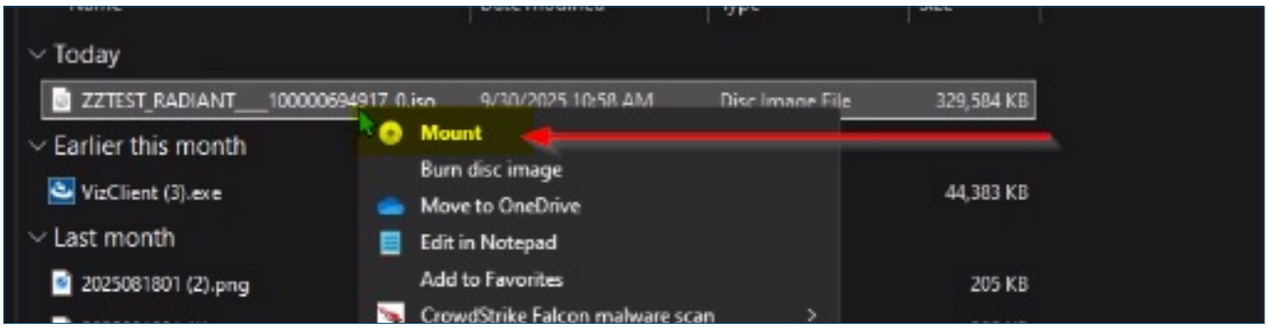

# 8

Once the download is complete, you can click the **Show in Folder** icon.

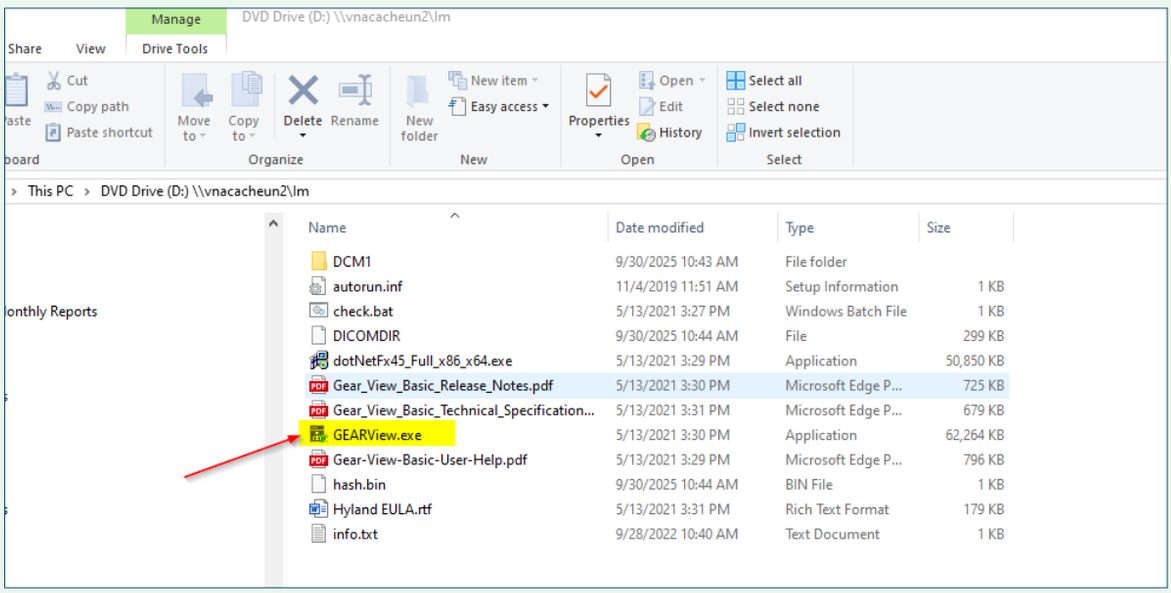

# 9

Once you are in the folder, you will see a .iso file with the patient name on it. This is your full downloaded study. If you want to view the study, right click to open menu, and click on **Mount.**

# 10

Once mounted, a directory should appear.

# 11

Double click on **GEARview.exe** to view the images, and you will be brought to this viewer.
