Diagnostic Mammography - At Wake Radiology, trained staff personally call all women who need to return for a diagnostic mammogram. All procedures are directed by radiologists who are onsite, and a radiologist takes time with patients to review results/images and discuss possible next clinical management steps so patients are more informed on how their referring physician may manage their breast diagnosis.

Standardized Sequence of Breast Imaging

* Stereotactic breast biopsy is only performed at our Cary Breast Center

† MRI-guided breast biopsy is only performed at our Raleigh MRI office

Please call scheduling if you have questions about a service not listed here or on the reverse.
